EXPERT SERIES INDUSTRIAL AIR-COOLED REFRIGERATION SYSTEMS

ALTA Refrigeration Inc. has been committed to developing the best industrial refrigeration solutions for more than 40 years. This means finding new ways to help your refrigeration operation succeed, such as reducing long-term operational costs for power, water usage, and maintenance.

Our EXPERT system is a modular refrigeration unit modeled after our traditional central system. Made with the same long-lasting materials, the Expert system is designed to deliver unrivaled reliability and efficiencies even after decades of operation.

These systems are shipped piped and wired for quick and easy installation. The EXPERT system is also designed for varying capacity requirements, and has the flexibility of “converting” from low- to high-temperature applications by simply adjusting the temperature set point.

The **EXPERT** Edge:

Low Cost to Install & Operate
Versus traditional
refrigeration systems

No PSM/RMP or Trained Operators
Uses a non-hazardous refrigerant

Reduces Energy Consumption
Defrosts with hot gas for
unparalleled efficiency

Air Cooled
Eliminates water usage, water
treatment, and condenser replacements

Field-Tested & In Demand
Over 17,223,079 FT² now installed &
operating with more than
19,188,437 FT² sold

Reliable Steel Construction
Stainless steel air sides and piping, and
hot dipped galvanized structural steel
offer decades of reliable operation
